SCIENCE (SCI)

SCI 200: History and Philosophy of Science (3 credits)
This course engages students in an exploration of scientific thought throughout the ages. Students will examine the contributions of historical scientists, the interaction of scientific reasoning on culture and society, the relationship between science and religion, and the adaptation of scientific thinking to an ever changing world.

SCI 204: Introduction to Human Disease (3 credits)
This course is an introduction to human anatomy with a general study of disease mechanisms and the effects on normal human physiology. Topics include electrolyte imbalances, tissue alterations, hypersensitivities, genetic disorders, cancer, and system pathology.

SCI 498: Science Internship (3 credits)
