

ECONOMICS (ECO)

ECO 211: Macroeconomics (3 credits)

This course examines the elementary principles of economics involving individual and social choice, economic analysis, supply, demand, the market and the price mechanism. Major concentration is on macroeconomic principles relative to money, the banking system, national income analysis, inflation, unemployment and the dilemma of stabilization, competing theories in contemporary times and world trade, development issues and alternatives, and evolving economic systems.

ECO 212: Microeconomics (3 credits)

Microeconomics studies theories of specialization, trade, income distribution and consumer choice; the theory of the firm; real-world market analysis; the problems of modern society; and the overview of evolutionary growth and change in the American economy.

ECO 240: Economics (3 credits)

The goal for this course is to make you better consumers of information, goods and services. It's to provide you with the tools you will need to navigate any social or economic climate. The text books for this course might seem a little unconventional for a historically quantitative course but that's because our texts illustrate how economics really affects you everyday. We will examine the elementary principles of economics involving individual and social choice, economic analysis, supply, demand, the market and the price mechanism. Major concentration will vary from macroeconomic to microeconomic principles relative to money, the banking system, housing, inflation, unemployment, education, health care, GDP and global trade.
