

# CLINICAL MENTAL HEALTH COUNSELING CONCENTRATION, MS

## Master of Science in Clinical Mental Health Counseling

The Master of Science in Clinical Mental Health Counseling provides students with an integrated and comprehensive program of study that will focus on the following areas: counseling theory, human growth and development, psychopathology, social and cultural foundations, clinical skills, group work, special treatment issues, appraisal, research and evaluation, and professional orientation. This 60-credit program enables students to strive to combine high intellectual achievement with skillful, compassionate and ethical clinical practice in Mental Health Counseling. This program requires completion of 60 semester hours of graduate level academic course credit, including a practicum of at least 100 hours and a 600 hour supervised internship.

This program of study affords students the opportunity to sit for the licensing examination and apply for licensure as a Mental Health Counselor (LMHC) for the state of Massachusetts, and parallel licenses, such as the LPC in Connecticut and other states. Since regulations for licensure change from time-to-time, it is the student's responsibility to keep abreast of possible changes with state regulations. Licensure regulations require individuals to complete a minimum of two years post-master's degree supervised clinical experience and pass a licensing exam. Students must complete the requirement of this track within a 5 year timeline. Ultimately, the state licensing board determines whether an individual satisfies the requirements for professional licensure (please see student handbook).

The goal of the M.S. in Clinical Mental Health Counseling is to deliver those core learning experiences established by academic program accrediting and state licensure boards to assure that program graduates are competent, ethical counselors prepared to enter the counseling profession and that graduates are able to provide high quality, science-based services to members of the community in post-graduate position on the path to Mental Health Counseling licensure.

To earn the M.S. in Clinical Mental Health Counseling, students must complete 60 credit hours of graduate coursework including a practicum of at least 100 hours and a 600 hour supervised internship.

Degree requirements for the Clinical Mental Health Counseling concentration are as follows:

Code	Title	Hours
PSY 501	Human Lifespan Development	3
